INNIO WAUKESHA APPOINTS VALMEC AS PLATINUM GAS COMPRESSION PROVIDER FOR AUSTRALIA

Valmec is proud to announce that the company has been appointed by INNIO Waukesha Gas Engines Inc. as a Platinum Tier Gas Compression provider for the Australian region.

As an authorised regional representative of INNIO Waukesha, Valmec has factory-direct access to new Waukesha® engines, spare parts, and product support capabilities to support customers in Australia, New Zealand and Papua New Guinea.

The program increases the opportunity for Valmec clients to benefit from genuine Waukesha trained service technicians, product support, and shorter lead-times.

Australian-owned, Valmec is one of the most experienced breakdown and maintenance service providers of major capital equipment within the region. The services team, comprising of experienced Waukesha AT/275GL+, VHP, and VGF series engine technicians, builds upon the new Valmec/INNIO Waukesha relationship, providing a value add to clients that cannot be quantified nor replicated by any other service provider.

With a wide range of model offerings, INNIO Waukesha offers Valmec the ability to fulfil the requirements of a wide spectrum of applications across various environments.

Valmec looks forward to a mutually benefiting, long-term relationship with INNIO Waukesha, and are excited to be providing genuine quality Waukesha products to our customers.

“With INNIO Waukesha already being a significant player in the Australian onshore gas processing and power generation space, this new, direct affiliation, complements our niche servicing and operations model for all gas producers and end users. With a significant number of trained technicians on the ground in Australia, Valmec is well-positioned to provide this new era of superior equipment support to new and existing clients in the market.”

- Steve Dropulich (Managing Director, Valmec)

About Valmec

Valmec is an Australian energy and multi-discipline services group providing specialised packaged equipment, construction, maintenance, commissioning and integrity maintenance services to the resources, energy and infrastructure sectors.

Through its wholly owned subsidiary APTS, Valmec is also a leading provider of Non-Destructive Testing (NDT) Services, Hydrostatic and Pneumatic Pressure Testing, Non-Metallic NDE and Testing Services along with an extensive list of Engineering support services to the Australian Oil and Gas, Power and Water Industries.

Founded by an experienced team of EPC and contracting professionals each with more than 25 years in the Australian gas industry, Valmec's focus is on the delivery of innovative project solutions, superior service and faster time-to-market options than the competition.

Valmec employs approximately 280 project and support personnel, operating out of modern offices, and fully equipped workshop facilities in Western Australia and Queensland.
