

COMPLETIONS & COMMISSIONING
SOLUTIONS

COMPLETIONS & COMMISSIONING

Overview of Valmec

Founded by an experienced team of EPC and contracting professionals, each with more than 25 years in the Australian and international oil and gas industry, Valmec's focus is on the delivery of value to our clients through innovative project solutions, superior service and faster time-to-market options in the energy and infrastructure markets.

Completions & Commissioning Solutions

Being a multidiscipline turnkey construction contractor, an integral part of the completion and handover phases are the acceptance testing and final commissioning of any facility or installation. Through our experienced teams of engineers, supervisors and trades personnel, Valmec provide the following support:

- > Technical field resources OEM trained to support the installation and commissioning of equipment and plant, inclusive of OEM requirements and your commissioning plans;
- > Mechanical and piping resources for hydrostatic and pneumatic testing, including draining, chemical cleaning, drying and blow throughs and vessel internal fit-out;
- > Electrical and Instrumentation resources for hazardous area inspections, loop checking, and cause & effect / function verification.

Valmec's team of experienced personnel are accustomed to utilising client Turnover and Completions databases and can tailor our approach in handing over the project to our clients' system commissioning needs.

The Valmec Offering

Markets	Energy				Infrastructure			
								
Delivery	Gas Compression & Processing	Construction				Completions & Commissioning	Service & Maintenance	
		Earthworks	Civil	SMP	ESI			
	Turnkey	EPC		BOOM		BOOT	Rental	
Location	Perth	Brisbane		Adelaide		Dalby	Roma	
	Greenfield	Brownfield		Remote		Regional	Metropolitan	
	National and Global Reach							

Mandurah Lateral Piggings Project

Ungani Facility Development

The Valmec Difference

- > Valmec offer full in-house, self-executed blue collar construction spectrum of trades personnel including SMP, E&I, & Civil/Earthworks disciplines;
- > Valmec incorporate pre-commissioning and completions documentation progressively to allow commissioning to commence immediately upon completion of physical work on site;
- > OEM certified and trained technicians for gas compression and processing equipment;
- > Valmec can lead, manage or support your commissioning and decommissioning activities and requirements.
- > Valmec can complete your site finishing works such as fencing, blue metal, pathways and signage etc., within a brownfields permit controlled environment.

Capabilities

Pre-commissioning and testing	OEM start up and commissioning
EEHA inspection and sign off	Real time documentation
Commissioning technicians and support personnel	Bump starts, cold loop and hot loop functional testing
Integrity testing	Start up and blow throughs
Operations transition support	Temporary works and spares
Depressurising and purging	Decommissioning

Experience

Mandurah Lateral Pipeline Piggings Project		Turee Creek Compressor Station		Ungani Facility Development	
Client	ATCO Gas	Client	APA Group	Client	Buru Energy
Location	Mandurah, WA	Location	Newman, WA	Location	Broome, WA
Scope	Pipeline purge, shut down, preparation and subcontractor management of operational pipeline	Scope	SMP pre-commissioning, electrical, control and instrumentation testing, hot and cold loop checking, purging and gas introduction preparation	Scope	Pre-commissioning of minimalist package and balance of plant components, ready for introduction of three phase upstream well hydrocarbons
